

## Petition for the formation of a LIDAR Division within the ASPRS

Lewis Graham, Division Director of the Photogrammetric Applications Division (PAD) within the ASPRS, recommended to the Board of Directors of the ASPRS that a new LIDAR division be formed. The primary objective of moving LIDAR activities (the Airborne and Mobile Mapping committees) from the PAD to the new division is to ensure that the ASPRS remains the preeminent US organization for the maintenance and sharing of knowledge relative to kinematic laser scanning. The BOD of the ASPRS provided unanimous support for forming the new division. One of the first steps in this process is obtaining the support of 200 voting members of the ASPRS via petition.

I, the undersigned, support the formation of a new division within the ASPRS focused on LIDAR technology. I am a current voting member of the ASPRS.
